

Label printer

a8⁺ The extra broad

Precise printing: elaborate – made easy

Transfer printer A8+

1 Big graphic display

White backlight guarantees optimal legibility.

2 Ribbon retainer

The threepart tightening axles allow a fast and easy ribbon exchange.

3 Easy adjustment

The print head is pressed down with two sliding toggles. One is mounted to the left label margin, the other one is pushed to the right label margin.

4 Peripheral connection

Add-on modules like cutter, external rewinder, present sensor, peel-off

adapter and applicators can be easily connected via USB peripheral interface. All peripheral devices are put onto the printer with two gudgeons and fixed with a bolt.

5 Solid, buckling resistant metal chassis

It is made of dye-cast aluminium. All devices are assembled to it.

6 Roll holder

Applicable for core diameters as of 38 mm. (we include adapters for core diameters from 76 mm for a better winding of the labels). The spring mounted margin stop

ensures constant tension while feeding and therefore a highly precise imprint.

7 Only one tool for all maintenance tasks

The Allen key is located ready to hand directly at the printer.

All required interfaces

- 1 RS232C interface.
- 2 USB 2.0 Slave interface.
- 3 Ethernet 10/100 Base T-interface with TCP/IP.
- 4 Slot for Wireless LAN-Wifi-card.
- 5 Two USB-Master-interfaces to connect an external operation panel, keyboard, scanner or Service Key.
- 6 Slot for memory card CompactFlash Type I.

Options

Centronics interface bi-directional acc. IEEE 1284.
Interface RS422/RS485 1.200 bis 230.400 Baud/8 Bit.

The interfaces are plugged onto the PC.
Connection to the printer via mini USB connection cable.

Label selection box – I/O box.
Up to 16 different labels can be loaded via SPS from a memory card. Operation of four in-/outputs via Basic Interpreter.

cab WLAN card 802.11 b/g.

Stand-alone operation

Printing with a cab printer without PC.

The layout of the labels is created either with the label software or direct programming via text editor directly on the PC. Label formats, fonts and graphic data, serial data and data base contents are saved or imported on the CF memory card or the internal IFFS printer memory.

Only variable data is sent to the printer via keyboard or host computer before being printed out. Data of a barcode scanner or a scale can be fed additionally.

Accessories for the stand-alone operation

Memory card

CompactFlash Type I

Compact keyboard

Connection: USB
Number of keys: 86

L x W mm: 282 x 132, Cherry Classic Line G84-4100 LCM

Standard keyboard

Connection: USB
Number of keys: 115

L x W mm: 460 x 192, Cherry G83-6504 LAD

The functions of the devices and conformity to CE-standards are only warranted by using the accessories made by cab or recommended by cab.

J	Job Start
H 100	Speed (100 mm/s)
O R	Orientation rotated by 180°
S 11;0,0,68,70,100	Size of label (100x68 mm, gap 2 mm)
T 10,10,0,5,pt20;sample	Text object/font: Swiss bold, 20 pt
B 10,20,0,EAN-13,SC2;401234512345	Barcode EAN 13, size SC 2
G 8,3,5,0;R:30,9,0,3,0,3	Graphic, box 30 x 9 mm,
A 1	Line strength 0.3 mm
	Number of labels (in this example 1)

Direct programming with J-Script

The printer language is easy to understand and integrate into your host system. Linkage of variable data with host application. Label design, graphics and fonts are recorded on the compact flash card. The host computer sends only the variable data to the printer.

Integration into SAP R/3

In collaboration with SAP cab developed the so-called "Replace method" in order to control the cab printers with SAPScript from SAP/R3.

As Silver Level-partner in SAP's Printer Vendor Program cab has access to the SAP development area for optimal printer support in an SAP environment.

SAP and R/3 are registered trademarks of SAP AG.

SAP® Printer Vendor Program

abc - Basic Compiler

As an integrated element of the firmware it enables the printer to process data via BASIC programming before being transmitted to print editing. Thereby external printer languages can be replaced or data from other systems, e.g. SPS or a scale, can be transferred to be printed on different label sizes.

Example of use:
Connection to a scale

Database Connector

In the stand-alone mode with additional network connection the Database connector enables stand-alone printers to link up data from a SQL-compatible database and to print. Data can be rewritten and modified simultaneously with the printing process.

Printer monitoring with Intra- and Internet

The integrated HTTP- and FTP-Server enables, with standard programs like web browser or FTP-clients, the print monitoring, configuration, the firmware-update and the administration of the memory card. Status signals, warning or error signals are sent to users or administrators either as email or SNMP-datagram via SNMP- and SMTP-clients. Synchronization of time and date with a time server.

cab Network Manager				
Device Tools Options Help				
Name	Type	Address	Status	Pin
cab	cab A4+7300	192.168.3.54	Ready	0-1
Support	cab D4+7300	192.168.2.111	n/a	0-1
Support	cab A6+7300	192.168.3.50	n/a	0-1

Administration Network Manager

The cab network manager enables the user to govern several printers within the network at the same time. It supports monitoring, configuration, firmware updates, memory card, datasynchronization and PIN-administration centrally.

Windows® driver

Our drivers are officially certified by Microsoft and ensure the direct creation and printing of labels from Windows-based programs like Word, Excel, Access, Works, Corel Draw etc.

Apple-Mac OS X® driver*

Alternatively cab offers a CUPS-based printer driver for MAC OS.

Linux driver*

Alternatively cab offers a CUPS-based printer driver for Linux.

*not for XD4M

Microsoft® is a registered trademark of Microsoft Corporation.

MAC OS® is a registered trademark of Apple Computer, Inc.

Label software

The ideal design of a label is realizable by using different fonts, heights, widths and arrangements. cab offers a large number of internal bitmap and vector fonts. Most of the country-specific codepages are supported, which means that county-specific special characters can be printed – in 24 languages.

● cablabel R2 Lite

Extensive standard label software. You get it - free of charge - included in delivery.

● cablabel R2 Pro

Maximum flexibility – whether simple texts, barcodes, graphics or the connection of databases. A wizard supports the creation of a UCC/EAN 128 barcode. It helps to open and handle several labels at the same time. Objects can be copied, moved and inserted into another label. It provides its own internal printer drivers which can communicate with the printer functions individually via J-Script.

Additional label software

Optimum variability – the transfer printers and the print & apply systems from cab can be easily controlled with other merchantable software like Codesoft, Easylabel, Bartender, NiceLabel or Labelview.

Environmentally conscious.

The specifications are according to our current technical knowledge. They are subject to change.

Cutting, winding and unwinding of material

Cutter

The cutter is used to cut paper, pressure sensitive labels, cardboard, textiles, synthetics or heat shrink tubes.

	Cutter CU8
Material width up to mm	232
Weight of material gr/m ² /cardboard	60 - 500
Material thickness mm	0.05 - 1.2
Cutting length mm	< 5
Gap height up to mm	2.5
Cuts/min.	100
Stop print job if	Final position not reached

External rewriter ER 1/2/3 for direct connection of the printer

The rewriter is screwed directly onto the printer. The label winding is optional inside or outside. A smooth and tight winding is due to the electronic control of the swing arm.

External rewriter ER 4/6/8 with built-in power supply

The rewriter can be attached to almost every other printer. All other technical data are according to the rewriter ER 1/2/3.

External unwinder EU 4/6/8

It enables a smooth feeding of labels for heavy rolls. The unwinder works both with inside and outside wound labels.

All examples for accessories are pictured with the thermal transfer printer A4⁺.

External panel

If the panel is not accessible anymore, e.g. after installation within a facility, it is possible to install an external panel. Additionally there is a slot for a CF memory card Type I and a USB Master interface.

Pause adapter PS7 for basic and dispense devices

The print job is stopped with the pause signal. The active label is finished, e.g. by using a label loop.

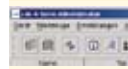

Inputs: Pause, external error

Outputs: No print job, printer not ready, print job active
